Factory price d curve breaker in Vietnam

Overview

Will Vietnam's manufacturing sector rebound in 2024?

The General Statistics Office projects a significant rebound in Vietnam's manufacturing sector in 2024, primarily driven by a recovery in export demand for electronics, computers, and components from key markets like the US, EU, and China.

What is the Vietnam manufacturing brief in 2025?

The Vietnam Manufacturing Brief in 2025 will help entrants understand the opportunities and challenges of this industry in the Vietnamese market and sketch out a picture of the investment environment, market entry requirements, and conditions for specific manufacturing activities.

How FDI is affecting Vietnam's manufacturing industry?

Faster growth in manufacturing translates to overall GDP growth, further strengthening the economy. In 2023, foreign investments in Vietnam's manufacturing industry led to a total investment of over USD 23.5 billion, comprising 64.2% of the country's total FDI capital, as reported by the Ministry of Planning and Investment.

What makes Vietnam an export-oriented manufacturing hub?

Vietnam's transformation into an export-oriented manufacturing hub is a result of its embrace of globalisation and trade liberalisation over the past decade. Here are four main pillars that underscore Vietnam's manufacturing advantage:
