

**NKOSITHANDILEB SOLAR**

# **Frame assembly integrated machine frame double glass components**

## Overview

---

What is a fully automatic framing machine?

A fully automatic framing machine, integrating the functions of frame loading, gluing, frame catching, framing and conveying; it greatly improves the production efficiency by accomplishing the technological process of module's gluing and framing. Simultaneously grabbing the frame from four sides to save time.

Who makes insulated glass processing machinery?

As a glass machinery manufacturer, we devote ourselves to products quality. Our advanced technology, high quality products and reliable service bring insulated glass processors much convenience. Hanjiang specializes the manufacturing of IG-insulated glass processing machinery.

How did IG Insulating Glass Company start?

The company made the first 5-year plan: gradually develop the supporting equipment for insulating glass production. In the same year, the development of IG line of series I and butyl extruder was completed and successfully introduced to the market. The first set of products was settled in Shanghai Flat Bending Glass Company.

What is Hanjiang-Mac insulating glass sorting system?

Hanjiang-Mac successfully launched the insulated glass sorting system and independently developed MES for insulating glass sorting system and insulating glass processing line., thus opening a new chapter in the intelligent manufacturing of insulating / insulated glass.

Learn how GED equipment can help maximize your production process by exploring our IGU manufacturing solutions for cutting, washing, ovens, extruders and pumps, Intercept® spacer ...

Integrated Igu Production Line with Dual Glass Panel Assembly Features Windows Machine, Find Details and Price about Insulating Glass Production Line Double Glazing Glass ...

THE CHALLENGE Today, the production of IG units with rigid spacers is often a trade-off between low material costs and high labor ...

Frame Assembly System This equipment can be used to realize the automation and information construction of the whole process and procedure of automatic loading of side frames and ...

Frame machine - solar module production line manufacturer and 100MW, 200MW, 500MW, and 1GW solar module production turnkey projects. ...

Hanjiang is manufacture of automatic IG production line, double glass processing equipment for insulated glass and double glass. Major products cover Automatic Insulated Glass Processing ...

Frame machine - solar module production line manufacturer and 100MW, 200MW, 500MW, and 1GW solar module production turnkey projects. fully automatic or semi-automatic production ...

Hanjiang is manufacture of automatic IG production line, double glass processing equipment for insulated glass and double glass. Major ...

THE CHALLENGE Today, the production of IG units with rigid spacers is often a trade-off between low material costs and high labor costs. The automation of frame production ...

Features Assembly aid for large frames: special hooks and brackets securely transport the frame to the required position. Automatic positioning: the machine automatically ...

A fully automatic framing machine, integrating the functions of frame loadinggluing, frame catching, framing and conveying; it greatly improves the production efficiency byaccomplishing ...

Machine frames serve to accommodate and position all the elements of a machine. Depending on the load effect and process accuracy, the frames need to be able to withstand ...

Hanjiang Profile Hanjiang is manufacture of automatic IG production line, double glass processing equipment for insulated glass and double glass. Major products cover Automatic Insulated ...
