Garden Solar Power System

Overview

How much do garden solar panels cost?

Garden solar panels function like traditional solar panels but are ground-mounted instead of roof-mounted and placed in your garden. They are typically more expensive than regular solar panels, costing approximately £11,700 for a 4kW system, but can help you save £1,304 annually on electricity costs.

Can you use solar panels in a garden?

As you can see, there are lots of ways to use solar panels in a garden. You can get anything from small, affordable solar lights, to large ground-mounted solar panel systems that can power a house. Either way, using solar panels is a great way to save on electricity bills, and lower your carbon footprint in the process.

Which solar panels should you choose for your garden?

However, if space is limited, you can opt for smaller panels, such as portable solar panels, or even mini solar panels that power garden lights, all of which you can set up yourself. Solar panel pergolas are also something those with a modest amount of space should consider.

How much do solar-powered garden lights cost?

Solar-powered garden lights usually cost between £30 and £200. Large roof-mounted solar panels cost a lot of money, and not everyone has the finances or roof-space for them. Luckily, there are lots of different ways to use solar panels in your garden, and most aren't that expensive.
