Grenada develops power generation and energy storage

Overview

How can Grenada achieve a sustainable future?

3.1. Intensify the diversification of generation mix and develop the potential of Grenada's indigenous energy resources (geothermal, wind, solar), increasing the share of electricity generated by renewable energy sources, in conjunction with the pledged climate mitigation efforts and the gradual phasing out of fossil fuels 3.1.a.

Does Grenada have electricity?

Electricity. Grenada has established a legal framework for the accelerated development of the supply of electricity from renewable energy, through the Electricity Act No19 of 2016 (amended in 2017) and the PURC Act No20 of 2016 (amended in 2017). The electricity subsector is currently under transformation.

Why is Grenada a good country?

The Government of Grenada (GoG) is committed to transforming the country into a more prosperous and resilient economy, where every citizen can live in harmony with the environment and benefit from the development of energy resources and the economy in a sustainable manner. Energy is a fundamental requirement for the development of the nation.

Why does Grenada need a cleaner transport system?

The Government recognizes the need to shift to cleaner and more efficient transport means and fuels. The goal is for transport in Grenada to become drastically less polluting.

The Government of Grenada (GoG) is committed to transforming the country into a more prosperous and resilient economy, where every citizen can live in harmony with the environment and benefit from the development of energy resources and the economy in a sustainable manner. Energy is a fundamental requirement for the development of the nation.

The Government recognizes the need to shift to cleaner and more efficient transport means and fuels. The goal is for transport in Grenada to become drastically less polluting.

The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels. PURC is seeking an independent power producer (IPP) to ...

Energy storage is a technology that holds energy at one time so it can be used at another time. Building more energy storage allows renewable energy sources like wind and solar to power ...

The nation of Grenada is pursuing sustainable power generation through diverse sources like solar, wind, geothermal, and hydroelectric. Harnessing these resources offers a ...

The National Energy Policy (NEP) 2023-2035 is Grenada's overarching high-level planning document that will anchor the energy development agenda over the period 2022 ...

OctoGrenada's Public Utilities Regulatory Commission (PURC) has granted licenses to eight investors under its Small-Scale Independent Power Producers ...

The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels. PURC is seeking an ...

Why Grenada's Energy Storage Push Matters in 2025 a Caribbean island where nutmeg-scented breezes mix with the hum of cutting-edge battery systems. That's Grenada today - a nation ...

This partnership will allow Grenada to efficiently harness the power of the sun for cleaner, more reliable energy generation. The project ...

The project, called the Grenada Renewable Energy Project, will be located at Maurice Bishop International Airport (MBIA), the main ...

The Grenada Geothermal Energy Development Project - A 15 MW renewable energy initiative to power Grenada's sustainable future with baseload geothermal electricity.

The project, called the Grenada Renewable Energy Project, will be located at Maurice Bishop International Airport (MBIA), the main international airport of Grenada. Option ...

This partnership will allow Grenada to efficiently harness the power of the sun for

cleaner, more reliable energy generation. The project seeks to integrate three solar ...

-The renewable energy target was updated in 2023 to 100% by 2035 for electricity generation from the previous target of 100% by 2030 for Electricity and Transportation outlined ...
