Group solar Glass Project

Overview

What type of panels does NSG Group's solar plant use?

NSG Group's 1.4 MW solar plant in Rossford, Ohio, is powered by more than 4,300 First Solar thin-film solar panels, featuring NSG Group's solar energy glass products. It is built on a repurposed brownfield site.

Does NSG make solar glass?

NSG Group has begun production of advanced solar glass at its renovated Ohio facility.

Why are solar glass suppliers investing in new production capacity?

As PV module capacity increases, glass suppliers are investing in new solar glass production capacity. New facilities are popping up in North America, with unique features to ensure competitiveness, such as using recycled material.

When will solar glass production start?

Production is expected to begin in 2026, with an annual nameplate capacity of between 5GW and 6GW. The project represents a US\$344 million investment. More recently the company signed a supply deal with US chemical producer Genesis Alkali to support the production of solar glass for its Georgia facility.
