Overview

Why do we need high-temperature supercapacitors?

The development of High-temperature supercapacitors (HTSc) has been motivated by the need for reliable energy storage systems capable of efficient operation under extreme thermal conditions, offering superior performance for critical industrial applications.

What is a high temperature supercapacitor?

High temperature supercapacitor series include 2.7v high temperature supercap and 5.5v high temperature supercap. These ultracapacitor can work under the temperature up to 85 °C. Kamcap supplies 2.3v hybrid supercapacitor HBM series.

Who makes supercapacitor in China?

Kamcap is one of the leading supercapacitor manufacturers in China. We supply high-quality ultracapacitors, including coin type supercapacitor, winding type supercapacitor, combined type supercap capacitor, module supercaps, high temperature supercap and hybrid capacitor.

What does a supercapacitor manufacturer do?

Manufactures capacitors with emphasis on supercapacitor technologies for electric applications. Manufacturing expertise ensures large production volumes to meet demand. Focus on R&D to enhance product efficiency and market adaptability. Contributes to the energy storage market with focus on supercapacitors and integrated solutions.
