Havana Uninterruptible Power Supply Solution

Overview

Why do we need uninterruptible power supplies?

However, during transmission and distribution, it is subject to voltage sags, spikes and outages that can disrupt computer operations, cause data loss and damage equipment. The uninterruptible power supplies protect the connected equipment from power problems and provide battery backup during power outages.

What is a three-phase online modular uninterruptible power supply system?

Three-Phase online modular uninterruptible power supply systems from the Modulon UPS family offer scalability and redundancy in a single frame, with up to 600 kVA. Delta's UPSs are some of the most advanced in the industry, renowned for their innovation, reliability, and efficiency.

Why should you choose delta power supply units?

The Delta line of uninterruptible power supply units includes superb options trusted by leading organizations across a wide array of industries, from financial institutions to medical centers. Small business owners also look to Delta for power solutions that keep their vital equipment running no matter what happens.

What is nup2105l system-level protection?

Robust system-level protection is one of the outstanding features provided by onsemi products. The NUP2105L has been designed to protect the CAN transceiver in high-speed and fault tolerant networks from ESD and other harmful transient voltage events.
