High-Temperature Resistant Off-Grid Solar Container for Rural Use in Ghana

Overview

Are solar-powered cold-storage systems a viable alternative to grid electricity?

Regular electricity is needed to operate cold-storage facilities; however, grid electricity in rural locations is frequently unstable. A solution is provided by solar-powered cold-storage systems; however, due to the high initial cost, farmers have not embraced these systems widely.

Is solar energy a good alternative to a traditional grid system?

The co-occurrence of solar radiation and cooling requirements makes it a desirable energy source that might reduce energy consumption for cooling processes by $\leq 40-50\%$. Therefore, solar energy would be a great alternative to the traditional grid system for operating cold-storage units in rural and remote areas.

Can solar PV off-grid cold storage help reduce poverty?

Solar PV off-grid cold storage systems can assist in mitigating those issues as well as bring sustainable development and economic growth to low-income populations, mainly in rural regions.

Can solar-powered cold storage system be used for horticultural crops?
