High quality magnetic breaker in Slovenia

Overview

Who is Magneti Ljubljana?

Established in 1951, the company has grown into a significant player in the magnet industry, employing over 200 dedicated professionals. Magneti Ljubljana proudly produces more than 88 million magnets annually, showcasing their capacity and commitment to innovation and excellence. What's the news about new products?

.

Why are Cast alnico magnets better than sintered magnets?

Because of their greater density, cast AlNiCo magnets have stronger magnetic properties than sintered magnets of the same class. On the other hand, due to economic reasons, casting technology, in comparison with sintering technology, is usually more suitable for producing magnets of larger dimensions.

Why is Magneti Ljubljana a good company?

Magneti Ljubljana is constantly monitoring the advancement in new magnetic materials development and is quite successful in developing its own materials and production processes in the attempt to be able to produce as "state-of-the-art" materials as possible. Obviously, the main motive is the sustainable growth and profitability of the company.

What happened to Magneti Ljubljana?

Despite a challenging landscape where the past 30 years have witnessed the closure of 27 magnet manufacturing companies in Europe, Magneti Ljubljana remains exceptionally strong. We continue to support and develop our lines of AlNiCo and SmCo magnets, proudly manufactured in Europe.
