Honduras computer room UPS uninterruptible power supply brand

Overview

What are the top manufacturers of uninterrupted power supply (UPS) in 2025?

The global Uninterrupted Power Supply (UPS) market continues to grow, driven by advancements in AI and edge computing. However, the market is predominantly dominated by manufacturers from the United States, China, and Europe. Here are the top UPS manufacturers in 2025: 1.Schneider Electric 2.Eaton 3.Vertiv 4.Riello UPS 5.Huawei 6.Toshiba 7.Piller.

What is an uninterruptible power supply (UPS)?

Power outages and electrical fluctuations are more common—and more damaging—than many people realize. Whether caused by weather, grid instability, or equipment failure, a sudden loss of electricity can mean lost data, fried components, or hours of unexpected downtime. That's where an Uninterruptible Power Supply (UPS) comes in.

How does an ups work?

A UPS stores energy in internal batteries and converts it into AC power the moment your main power fails. Depending on the model, it might activate instantly (standby UPS), regulate voltage continuously (line-interactive), or offer full isolation from the power grid by double-converting energy (online UPS).

Who is the leading UPS manufacturer in the world?

With four manufacturing bases and 23 years of experience in developing and producing various UPS systems (both three-phase and single-phase), INVT stands as a trusted UPS manufacturer globally. According to UPS industry report, the market is estimated to register a compound annual growth rate (CAGR) of 4.11% throughout 2025.
