# **Household solar container battery warranty period**

## Overview

---

What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.

How long does a solar battery last?

The warranty for the Enphase IQ Battery, for instance, ends at 10 years or 7,300 cycles, whatever occurs first. Solar installer Sunrun said batteries can last anywhere between five to 15 years. That means a replacement likely will be needed during the 20 to 30 year life of a solar system. Battery life expectancy is mostly driven by usage cycles.

Do solar panels come with a warranty?

- Solar panels: Typically come with a 10-15 year product warranty, and a 25-30 year performance warranty guaranteeing a certain level of power output.
- Inverters: Usually covered for 5 to 10 years, depending on the brand. Some offer optional warranty extensions.

Do Australian batteries have a 10-year warranty?

Australian warranties look simple— “10-year warranty” splashed across brochures—but the real coverage rests on four intertwined promises. Understanding those promises and how they interact with your own energy habits and ACL protections ensures you pick a battery that will serve your household for the long haul.
