Household solar container energy storage system quotation in Ho Chi Minh Vietnam

Overview

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FITs were relatively low.

What is solar & storage live Vietnam?

At Solar & Storage Live Vietnam, we'll explore: MOUNTING, ASSEMBLY & RACKING Getting to grips with the major issues affecting large-scale solar project developers and their partners. Driving the proliferation of commercial & industrial rooftop solar projects across Vietnam, greening operations and reducing operating costs.

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy Corporation, noted that the new scheme supports the adoption of storage and provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.
