# How good is Romania's uninterruptible power supply

LFP 48V 100Ah

## Overview

---

Will Romania supply energy security?

Andreea Campeanu for The New York Times “We will supply energy security for the neighborhood,” Virgil-Daniel Popescu, Romania’s energy minister, said in an interview after lawmakers passed legislation designed to encourage investment in gas production.

Why is the energy sector weak in Romania?

The energy sector in Romania is under stress amid temperatures lower than average. The weakness is however structural, a combination of several underlying factors. One, the country is gradually shutting down coal power plants. Investments in replacing the capacity are accelerating, especially in solar power, but not enough.

What's happening with Romania's electricity system?

The government declared the Mintia gas power plant a project of national importance, to bolster baseload energy sooner, while Electrica was hit by a cyberattack. It's not even real winter yet, but Romania's electricity system is stretched to the brink. Imports broke records last week, topping 3 GW at times.

Does Romania have a deficit in electricity production?

A deficit in domestic electricity production is jeopardizing Romania, with imports amounting to more than 35% of consumption during daily peaks. According to Minister of Energy Sebastian Burduja, the energy sector is saving water in hydropower reservoirs and coal reserves for colder days and unforeseen events.
