# How long is the life of solar tiles

## Overview

---

Modern solar roof tiles are engineered for 25-30 year lifespans, with many manufacturers offering warranties that guarantee 80-90% of original performance after 25 years. How long do solar tiles last?

The lifespan of solar tiles is 25 to 30 years. Steel roofing tiles and sturdy, durable glass solar tiles are used to construct solar roofs, which also come with sizeable warranties. Solar shingle installation can take up to a week. However, with routine maintenance, solar tiles can last longer than the typical 25-30 years.

Do solar roof tiles need maintenance?

The life span of the solar roof tiles is less than 10 years, so we aren't fully sure about what kind of maintenance is required there. It is the point to think that as long as the solar tiles are appropriately interconnected, they do not ask for any type of maintenance.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What is the tile life?

The Tile Life's large-format rectangular tile is durable and has a long life expectancy. It is easy to clean and low maintenance, making it an ideal choice for almost any residential or light commercial space. Transform any residential or commercial space with the timeless collection.
