How many 5G base stations are there in Albania

Overview

What percentage of Albanians have 3G and 4G?

In 2019, 99.2% of the population had 3G network coverage, while 4G covers about 95% of the population in Albania.²³ During the same year, the mobile-broadband Internet traffic within the country corresponded to 0.069 exabytes.²⁴

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

How many 5G base stations are there in Japan?

Japan had over 100,000 active 5G base stations by 2023. Japan's 5G network is expanding rapidly, with over 100,000 active base stations by 2023. The country has taken a strategic approach, focusing on major urban centers first and gradually expanding to rural areas.
