# How many signal base station sites are there in the United States

**FLEXIBLE SETTING OF  
MULTIPLE WORKING MODES**

## Overview

---

What is the United States cell tower map?

**United States Cell Tower Map** The United States Cell Tower Map features over 25000 locations with corresponding tower and radio information. This map is useful in planning and troubleshooting cellular networks for IIoT / SCADA monitoring applications. SCADACore's Industry 4.0 solutions include true.

How many cell sites are there in the US?

There are nearly 419,000 cell sites across the US, according to the newest figures from CTIA. The trade association recently published its annual survey of its wireless network operator members, a report that helps clarify and quantify some of the industry's regulatory issues.

How many buildings support wireless infrastructure in 2024?

By the end of 2024, just over 651,000 structures supported wireless infrastructure across the United States. This includes dedicated cellular towers, broadcast TV and radio towers, water towers, rooftops, church steeples, billboards, utility poles, farm silos, and other buildings.

How many cell towers does SBA have?

Meantime, SBA Communications counts around 30,000 cell towers across North and South America, while American Tower has about 43,000 cell towers in the US. Other major cell tower owners in the US include Vertical Bridge and Harmoni Towers.
