## Overview

---

How much does a solar AC cost?

We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner. In general, they cost \$1,600-13,000. Mini splits are more affordable, while solar-powered central air conditioners cost more.

What is a solar air conditioner?

Solar air conditioners are solar-powered air conditioners designed to efficiently and effectively provide cooling to a room. Solar air conditioners use solar panels to power the air conditioner, and solar hotspot energy gives much power to the air conditioner's condenser and refrigerant.

Are solar air conditioners worth it?

Solar air conditioners usually cost more than traditional cooling systems. But the upfront expense is worth it to many because of the monthly energy savings. We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner.

How many square ft can a solar air conditioner cool?

The air conditioner can heat or cool up to 750 Sq. Ft (69 m<sup>2</sup>). It is a self-cooling air conditioner that requires no grid connection. This air conditioner operates on 100% solar power and does not require batteries, an inverter, or a charge controller. It also works on grid power when the best solar conditions are unavailable.
