For instance, during colder months, demand for electricity can surge, leading to higher prices. Similarly, global events such as geopolitical tensions or changes in energy policies can also impact the cost of electricity. As of now, the average electricity price in Sweden is around 65 öre per kWh.

Should Sweden have an electricity surplus?

How do I get electricity prices in Sweden?

We collect hourly prices for electricity in Sweden's different areas directly from the Nordpool electricity exchange. These prices, which are originally quoted in Euro, are converted into Swedish kronor using the current exchange rate from the Riksbank.
