Installation of solar panels in the UK

Overview

Installation involves a multi-step process including site assessment, system design, scaffolding, and a 1-2 day setup, followed by certification and SEG registration. How do accredited solar panel installers install solar panels in the UK?

Here's a step-by-step guide to the solar PV installation process used by accredited solar panel installers in the UK. Every solar panel installation begins with a detailed site assessment. An accredited installer will inspect your roof's size, condition, pitch, and orientation to make sure it's suitable for a solar panel fitting.

How are solar panels installed?

Then, the solar panels are installed on the roof, clipped into place on the mounts, and wired together either in series or parallel, depending on the system design. Most solar panel installations in the UK are completed in 2-3 days for residential properties.

How much do solar panels cost UK?

If you're comparing solar panel cost uk, checking typical solar panels uk cost, or searching for the latest solar panels uk price, here's a rough guide. As a guide, the average London install (including professional fitting) sits at around £9,500.

How do solar panels work in the UK?

In the UK you'll see two main flavours: Solar PV (photovoltaic) panels make electricity. Each panel holds lots of tiny cells; light hits them, they produce direct current (DC), and an inverter turns that into alternating current (AC) for your sockets or for export to the grid.
