Overview

What is premium Tig 315 pulse AC/DC welding inverter?

Discounts available from your local dealer Premium TIG 315 Pulse AC/DC welding inverter is a technologically advanced three-phase multi wave power source suitable for medium to high production cycles. The innovative and user-friendly digital panel allows full control of the welding parameters.

Why should you choose a TIG 315 AC/DC?

The innovative and user-friendly digital panel allows full control of the welding parameters. The excellent technical characteristics of the TIG 315 AC/DC make it an ideal choice for professionally skilled TIG welders that require precise control and reliable performance.

How does an AC-AC inverter convert AC to AC?

An AC-AC inverter converts three-phase AC energy from the permanent magnetic generator connected to the engine to direct current. Then, it outputs a sine wave. Our AC-AC inverters can also be set up and used in parallel operation with our CPU-based digital control.

What is the efficiency of ACDC bidirectional converter?

The system incorporates three-level active neutral point clamped ACDC bidirectional converter, achieving a peak efficiency of 99.15% and 98.95% in three-phase PFC rectifier mode and inverter mode respectively.
