Is East Timor making money from selling outdoor power supplies

Overview

Timor-Leste, in Southeast Asia, emerged from decades of conflict in the late 20th century to become an independent nation in 2002. A key focus for the new nation has been to improve energy access via the rapi.

Is East Timor at an energy development crossroads?

Vendors sell vegetables with battery supported lights at a market in Dili, East Timor, Sept. 8, 2024. (AP Photo) JAKARTA, Indonesia--East Timor is at an energy development crossroads.

How much energy does East Timor use?

East Timor has one of the lowest levels of energy consumption per capita in the world, ranking 193rd as of 2008. In 2022, its electricity consumption was 414.76 million kilowatt-hours. Imported fossil fuels are the primary source of energy for the country, but access to this energy is highly uneven.

Does East Timor need a power plant?

East Timor's current power plants, which were built with large investments from the government in recent decades, can also produce far more electricity than the country demands, lowering the imperative for the country to switch systems, Heynen said. Still, East Timor's government has expressed interest in transitioning its energy sector.

Will East Timor transition its energy sector?

Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants. In 2021, it announced tendering for solar parks and a feasibility study for hydropower schemes.
