# Is Strong Light a rechargeable outdoor power source

## Overview

---

What is the best rechargeable lantern?

The Black Diamond Orbiter 450 nearly won our best rechargeable lantern category for its light weight, USB-C ports, and in-put and output capability. We also liked that you can cycle through light cycles, including a low light option that flickers like a campfire and a spotlight that focuses up only.

Are rechargeable lanterns better than disposable batteries?

Rechargeable lanterns also don't have the failure points of lanterns that use disposable batteries. Corroded disposable alkaline batteries can become an issue for those who camp a few times a year, especially if stored in a garage or basement that gets moisture. Rechargeable lanterns are less prone to that possibility.

Which led lantern is best for camping?

It's also our winner for best brightest lantern-outputting whopping 1,200 lumens. The ust 60-Day DURO LED Lantern is also the winner for the longest-lasting camping lantern with a battery life of 60 days using 4 D batteries.
