### Can solar panels protect your roof?

Go green today! Ensure that your house's most crucial loads stay on even during power outages without overspending on a battery backup. While solar panels could help protect your roof, our partners cover the labor but also the panels themselves . Keep Your Home Powered Year-Round With More Sustainable Energy.

### Can old roofs damage solar panels?

Older roofs may sustain damage from the foot traffic during solar panel installation and maintenance. Older or damaged roof sheathing probably won't be strong enough to withstand the additional weight of shingles and solar arrays.

### Can solar panels cool a roof?

A study from the University of California, San Diego, found that solar panels can reduce the roof temperature by an average of 5 degrees Fahrenheit during the day. This cooling occurs because solar panels absorb sunlight that would otherwise hit the roof and convert it into energy, reducing the heat transferred to the building.

### Are solar panels safe?

While solar technology is generally considered safe, the public has raised certain health concerns, which typically fall into three categories: electromagnetic fields (EMFs) and radiation, chemical exposure from the materials used in solar panels, and the potential thermal impact on homes and neighborhoods.
