**Is the new 5g base station of
Sanwei Communication real**

Overview

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G sites are there in China?

Mobile operators in China are ramping up 5G and 5G-A rollouts, with the former now at 4.5 million cell sites and the latter in 300 cities; a new 2027 roadmap will see 75% of mobile data in the country on 5G networks. 5G on 5M sites – China has over 4.486 million 5G sites; 5G now comprises more than 35% of total mobile base stations.

Can a 5G base station be used autonomously?

When operating near existing 5G civilian areas, the PLA also has ways to piggyback China's 4.2 million base stations. This can be achieved autonomously and in "the blink of an eye."

Is the new 5G base station ready for battle?

Developed to facilitate large-scale drone integration into the PLA, the new mobile 5G station has been rigorously tested and is now ready for battle. The new 5G base station allegedly has unprecedented high-speed, low-latency, and extremely secure and reliable data exchange services to at least 10,000 users within a 1.8-mile (3 km) radius.
