Japan s Government Procurement of Mobile Energy Storage Container DC Power Generation

Overview

Will HDRE build a new energy storage system in Japan?

Jason Chou, General Manager of HDRE, outlined the company's ambitious plan to build 1.5GW of energy storage systems in Japan over the next three years, involving a capital investment of approximately NT\$50 billion.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

Which battery energy storage projects have been selected for 2024?

Battery energy storage projects in Japan have been selected through the Long-Term Decarbonisation Power Source Auction for 2024.

How many battery energy storage systems were awarded a contract?

25 battery energy storage system (BESS) projects of 'between' 3-hour to 6-hour duration were awarded contracts totalling 1,322,810kW (1.3GW). One BESS project of specified 6-hour duration also won a 47MW contract, as did two PHES projects which each got selected for 180MW contracts.

A total of 26 battery energy storage projects in Japan have been selected for contracts through the Long-Term Decarbonisation ...

Following the successful bid in Japan's first tender for long-duration decarbonization energy storage, HDRE has secured a 73MW capacity and will benefit from a ...

Following the successful bid in Japan's first tender for long-duration decarbonization energy storage, HDRE has secured a 73MW ...

Five 20-year fixed revenue capacity market contracts secured through Japanese government's second Long-term Decarbonization Auction NEW YORK & TOKYO - April 29, ...

A total of 27 projects was awarded 34.6 billion yen in subsidies through METI's FY2024 program for supporting the expansion of renewable energy through introduction of ...

In January 2024, Japan held its first Long-Term Decarbonization Power Source Auction ("Auction"), a support program ...

Japan's first auction for long-term zero emissions power capacity has attracted strong bidding interest with a plan to install battery storage, as investment in the power storage system is ...

In January 2024, Japan held its first Long-Term Decarbonization Power Source Auction ("Auction"), a support program that encourages investments in large-scale power ...

A significant stride towards Japan's carbon neutrality goals has been made as the energy storage platform backed by leading infrastructure investment firm Stonepeak and CHC ...

A total of 26 battery energy storage projects in Japan have been selected for contracts through the Long-Term Decarbonisation Power Source Auction (LTDA) for 2024.

A total of 27 projects was awarded 34.6 billion yen in subsidies through METI's FY2024 program for supporting the expansion of ...

Conclusion Japan's energy storage sector is gaining definition--driven by household adoption, corporate mandates, and government policy. Yet the rollout remains ...

Five 20-year fixed revenue capacity market contracts secured through Japanese government's second Long-term Decarbonization ...

Well, Japan's just made it today's business reality through its latest power storage project bidding system. With 78% of the country's energy still imported in 2023, the government's pushing ...

This procurement is covered by the WTO Agreement on Government Procurement, Japan-EU Economic Partnership Agreement or Japan-UK Comprehensive Economic Partnership ...
