Overview

Does Kiribati have a submarine fiber cable?

All international and inter-island connectivity currently depends on satellite links, and Kiribati has no submarine fiber cable. Amalgamated Telecom Holdings Kiribati Ltd (ATHKL), trading as Vodafone Kiribati, is the main operator after acquiring Telecom Services Kiribati Ltd in 2015 and upgrading 3G/4G coverage in Tarawa and Kiritimati.

Why does Kiribati need Internet access?

Internet access in Kiribati plays a pivotal role in overcoming the country's isolation and driving development. As a small island developing state, Kiribati's connectivity is a lifeline for education, healthcare, government services, and participation in the global economy mict.gov.ki mict.gov.ki.

What is the submarine cable connection from Kiribati to Southern Cross?

Submarine cable connection from Kiritimati, Kiribati to the Southern Cross NEXT cable system. This will be the fifth ICT cable project undertaken by ADB. The project will link Kiribati, Nauru, and Kosrae State, Federated State of Micronesia (FSM) to the internet cable hub in Pohnpei State, FSM.

Does Kiribati have a telecom network?

Infrastructure Limitations & Geography: Kiribati's island geography makes traditional telecom infrastructure deployment extremely difficult. The 33 atolls are spread thousands of kilometers apart, so laying fiber-optic cables domestically is impractical and microwave links cannot span such distances budde.com.au.
