Laos solar container booster station

Overview

Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

How will China-Laos energy transition work?

The clean energy produced will be transmitted to Yunnan province in China via the China-Laos 500kV grid, supporting Yunnan's energy transition and power supply security. Laos is currently at a critical stage of its energy transition.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
