Liechtenstein UPS Uninterruptible Power Supply 3K Price

Overview

What is a 3kva uninterruptible power supply?

3kVA uninterruptible power supplies are designed to power loads up to 3kVA but the kilo-Watt loading will depend on the UPS output power factor. Typical loads for a 3kVA UPS include file servers, storage devices IT networks and VoIP telecoms systems.

What is a 3kva UPS system?

3kVA UPS systems available from Server Room Environments include line interactive and on-line uninterruptible power supply systems. 3kVA UPS will be rated at 3000VA and have different output Watts rating dependent upon the power factor used by the UPS manufacturer. Please check the individual products for their kW rating.

How much power can a 3kva Ups supply?

If you are sizing your UPS load in Watts or kW (3000Watts), the UPS should be suitably rated. A 3kVA UPS may be rated at unity power factor (1PF) which means that the UPS can supply 3kVA/3kW of load. If the power factor is less (typically 0.9 or 0.8) then the Watt load should not exceed 2700W (2.7kW) or 2400W (2.4kW) etc.

How many watts can a 230 volt Ups supply?

The standard UK single phase mains power supply voltage in the UK is 230Vac 50Hz. 3kVA = 3000VA which on a 230Vac supply means that a 3kVA UPS will be able to supply 13.04Amps in total ($230V \times 13.04Amps = 3000VA$). If you are sizing your UPS load in Watts or kW (3000Watts), the UPS should be suitably rated.
