Manila rooftop solar panels

Overview

What is the potential of solar rooftops in the Philippines?

1. The Potential is Massive The Philippines has a solar rooftop potential of over 15-20 GW. That's enough to power millions of homes and businesses sustainably. Metro Manila alone has over 2.5 GW of technical potential just from rooftops (per ADB and IFC reports).

Where is the largest PV rooftop installation in the Philippines?

Currently the largest PV rooftop installation in the Philippines is on top of one of several SM Malls in the Philippines. (Photo by SM Prime).

Who is Philippine solar rooftops?

Philippine Solar Rooftops is a renewable energy company that provides high level and professional service to commercial and industrial customers including residential.

Why should you choose Philippine solar rooftops?

Philippine Solar Rooftops has professional and well trained solar power system designers that assesses the requirement, review the possible locations and assesses the existing structure where the panels will be located. This will result in the most efficient and optimum design. How much weight does a solar power system puts on the roof?
