

## NKOSITHANDILEB SOLAR

# Mauritius BESS solar container outdoor power

Modular design,  
unlimited combinations in parallel

**BUILT-IN DUAL FIRE PROTECTION MODULE**

## Overview

---

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

Where are the BESS installations located?

The CEB has two BESS installations located at Amaury Substation and Henrietta Substation. Each BESS is made up of two containers of 20ft housing 10 racks of Lithium Ion batteries for a total energy storage of 1.12 MWh and two power converters with a total installed capacity of 2.24 MW respectively.

What is BESS and how does it work?

BESS (Battery Energy Storage System) is a high-tech, ultra-fast response battery system designed to upgrade the electricity grid. It aims to make the electricity network in Mauritius smarter, more modern, and cleaner.
