Mobile Solar Power Trailer

Overview

How does a solar powered trailer work?

By absorbing solar energy through the solar panels, it can directly supply power. At the same time, it stabilizes the trailer's support legs, ensuring its usability on any terrain and maintaining the stability of the operation. It can be intelligently monitored. The video can be monitored in real time through the mobile APP.

What is a heavy-duty solar generator trailer?

Our new heavy-duty solar generator trailer is built on a custom open-frame chassis, engineered for tough environments and long-term durability. Light enough to be towed by most trucks/SUV's powerful enough to run 3,600-watt loads. Built on the same compact frame as the MS-200, but with more power & battery capacity.

Why should you choose a trailer mounted solar system?

Get the ultimate solar power solution that's built for you. Our trailer mounted solar systems are fully customisable with optional features including CCTV and weather station. Flexible and efficient energy solution that can easily be transported and deployed in various environments. Clean and renewable power contributing to a greener future.

What are enclosed trailer solar generators?

Our primary line of enclosed trailer solar generators. Built with high efficiency solar modules and industrial battery banks. Silent, efficient & durable. Additional solar - plug and play. These Solar Auxiliary trailers are designed to boost the solar energy harvest of our MS and AN Series generators.
