Overview

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

What is a mobile power station?

The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require with fuel and are noisy, this mobile power station uses solar energy with no noise pollution.

What is Mobii green energy?

Mobii is committed to developing innovative green hydrogen power generation technologies to address global energy shortages and water pollution issues. With its breakthrough hydrogen energy technology, 30x energy amplification, and zero-carbon power generation, Mobii Green Energy redefines the future of energy.

What is mobipower & how does it work?

The MOBIPOWER, more than anything else, is a green power station focusing on using renewable sources of energy at all times, and by doing so, this energy container will produce almost 90% less CO2 and other greenhouse gasses compare to a generator only power station.
