Morocco Commercial solar Energy Storage

Overview

Does Morocco need a solar power station?

Ouarzazate Solar Power Station. As of 2019, renewable energy in Morocco covered 35% of the country's electricity needs.

Why is Morocco investing in solar power?

Morocco is intensifying investment in solar power in the hope of hitting a target to raise the use of renewables in its energy mix to more than half. The country has set a target of 52 percent renewables by 2030 after achieving previous targets, local media reported.

Is Morocco planning a giant power storage facility?

Morocco is also planning to invite bids for a giant power storage facility with a capacity of nearly 1,600MW, the officials said. The facility, which will use batteries, will supply power to Kenitra and nearby areas.

Does Morocco have a solar energy plan?

Morocco has since pledged to increase the renewables in its electricity mix to 52% by 2030, made up of 20% solar, 20% wind and 12% hydro. In November 2009 Morocco announced a solar energy project worth \$9 billion which officials said will account for 38 percent of the North African country's installed power generation by 2020.
