# **Nepal Hydropower Energy Storage Project**

## Overview

---

Kathmandu, Ma- The Nepal Electricity Authority (NEA) has prioritized the development of pumped storage hydropower projects to manage daily fluctuations in electricity demand and enhance the country's energy security. Can pumped storage hydropower be used in Nepal?

In this study, we assess the potential of pumped storage hydropower across Nepal, a central Himalayan country, under multiple configurations by pairing lakes, rivers, and available flat terrains. We then identify technically feasible pairs from those of potential locations.

Can solar PV be integrated with pumped hydro storage in Nepal?

Integrating Solar PV with Pumped hydro storage in Nepal: A case study of Sisneri-Kulekhani pump storage project Hydropower Development in Nepal - Climate Change, Impacts and Implications Mool PK, Wangda D, Bajracharya SR, Kunzang K, Raj Gurung D, Joshi SP.

How does hydropower contribute to the electric grid in Nepal?

Hydropower energy's contribution to the electric grid in the region is predominantly from the run-of-river hydropower plants . Numerous previous studies have examined run-of-river and storage-type hydropower projects in Nepal , , , , , .

Can a geospatial model predict energy storage capacity across the Nepal Himalayas?

In this study, we configured a geospatial model to identify the potential of PSH across the Nepal Himalayas under multiple configurations by pairing lakes, hydropower projects, rivers, and available flat terrain, and consequently estimate the energy storage capacity.

## Nepal Hydropower Energy Storage Project
