# New Energy Storage in the Southern Region

 **TAX FREE**

## ENERGY STORAGE SYSTEM

**Product Model**

HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**

1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**

215KWH/115KWH

**Battery Cooling Method**

Air Cooled/Liquid Cooled

## Overview

---

Where is China's first large-scale energy storage plant?

A 10-MWh sodium-ion battery energy storage station has been put into operation in Guangxi, southwest China, the country's first large-scale energy storage plant using sodium batteries. (Image credit: China Southern Power Grid Energy Storage).

Where is a 10 MWh sodium-ion battery storage station located?

A 10-MWh sodium-ion battery storage station was put into operation on May 11 in Nanning, Guangxi in southwestern China, said China Southern Power Grid Energy Storage, the energy storage arm of Chinese grid operator China Southern Power Grid.

What is China Southern power grid's Guangxi energy storage station?

The energy storage station, built by China Southern Power Grid's Guangxi branch, is the first phase of an overall 100-MWh project.

Where is a sodium-ion battery energy-storage station located?

On May 11, a sodium-ion battery energy-storage station was put into operation in Nanning, south China's Guangxi Zhuang Autonomous Region, as an initial phase of an energy-storage project. After completion, the project's overall capacity will reach a level of 100 MWh, which can meet the power demand of some 35,000 households every year.

A 10-MWh sodium-ion battery storage station was put into operation on May 11 in Nanning, Guangxi in southwestern China, said China Southern Power Grid Energy Storage, the energy storage arm of Chinese grid operator China Southern Power Grid.

The energy storage station, built by China Southern Power Grid's Guangxi branch, is the first phase of an overall 100-MWh project.

On May 11, a sodium-ion battery energy-storage station was put into operation in Nanning, south China's Guangxi Zhuang Autonomous Region, as an initial phase of an energy-storage project. After completion, the project's overall capacity will reach a level of 100 MWh, which can meet the power demand of some 35,000 households every year.

"China's advances in new-type energy storage are moving from isolated breakthroughs to a more systematic framework," said Rao Hong, chief scientist at China ...

When sodium-ion battery energy storage enters the stage of large-scale application, the cost can be reduced by 20 percent to 30 percent, and the cost per kWh of ...

China Southern Power Grid is developing a trading mechanism to adapt to the participation of emerging market entities such as pumped storage, new energy storage and virtual power ...

Uniper has received full approval for the construction and operation of a 50-megawatt battery storage facility at the former Wilhelmshaven power plant site. With this step, ...

A 500 MW/2,000 MWh standalone battery energy storage system (BESS) in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction ...

When sodium-ion battery energy storage enters the stage of large-scale application, the cost can be reduced by 20 percent to 30 ...

20 hours ago Independent energy storage stations in Guangdong province have already reported operating losses with similar losses occurring in Guangxi Zhuang Autonomous ...

On May 11, a sodium-ion battery energy-storage station was put into operation in Nanning, south China's Guangxi Zhuang Autonomous Region, as an initial phase of an energy ...

KASHGAR, China, J/PRNewswire/ -- On July 21, the 500,000-kilowatt independent energy storage project of Huadian, located in Akkash Township, Kashgar City, was ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's ...

In a landscape with an average altitude of about 4,700 meters, this pioneering energy storage system developed by tech giant Huawei, based in South China's Shenzhen, ...
