# **New Zealand Auckland computer room UPS uninterruptible power supply manufacturer**

## Overview

---

What is an ups & how does it work?

A UPS contains a battery that supplies power for a limited time, allowing users to save work or safely shut down systems during power disruptions. UPS devices are essential for ensuring data integrity and preventing damage to sensitive equipment. For more information, check out our complete guide to uninterruptible power supplies.

What are Allen-Bradley uninterruptible power supplies (UPS)?

The Allen-Bradley range of Uninterruptible Power Supplies (UPS's) are ideal for use in Industrial processes and are available in both a standard rugged design and a networking model option with remote control and battery expandable features.

Why do you need an UPS system?

Designed and tested to excel in the most demanding environments. Find everything you need to keep your systems running smoothly. A UPS (Uninterruptible Power Supply) system ensures that critical infrastructure remains operational during power outages, voltage fluctuations, and surges.
