

# New Zealand home solar panels

## Overview

---

Can a solar panel system be used in New Zealand?

A: Yes! New Zealand gets between 1,700 and 2,400 hours of sunlight per year — more than enough for a solar panel system for home use. With rising electricity prices and government support for solar energy buyback, many homeowners see a full return on their investment within 7–9 years.

Are solar panels safe in New Zealand?

Solar systems must meet New Zealand's strict safety standards, and installations must be approved by local electricity distribution companies. Unsafe systems including DIY setups and illegal plug-in panels can cause electric shocks, fire risks, or even result in being disconnected from the grid.

How much does a solar panel cost in New Zealand?

You'll pay around \$8,000 fully installed. While global demand bumped prices slightly in 2022 and 2023, costs are falling again in 2025 — thanks to sharp drops in solar panel pricing. Use our free 3 Solar Quotes Service to compare competitive prices from top-rated installers. [What Is The Cost Of A Solar Panel System In New Zealand?](#)

Are solar panels a smart choice for New Zealand households?

Installing solar panels is a smart choice for many New Zealand households. It offers a mix of environmental benefits, long term savings, and greater energy security. Contact Future Energy today for a no obligation assessment and a personalised solar quote tailored to your home and lifestyle.
