# Normal size of solar panels

## Overview

---

What are the dimensions of standard solar panels?

Most solar panels are about 1.5 inches thick. The typical classification of solar panel sizes is based on the solar cell size, but it's not very useful for most calculations.

How big should a commercial solar panel be?

For commercial solar panel installations, panels often range from 400W to 600W, with dimensions of approximately 195 x 99 x 3.81 cm (6.40 x 3.25 x 0.13 feet). Several factors affect the size of a solar panel, including the type of solar cells used, the desired wattage output, your property's size and the panel's overall efficiency.

How big is a residential solar panel?

A typical residential solar panel measures about 65 inches by 39 inches and covers nearly 18 square feet. Most residential solar panels are about 65 inches by 39 inches. That's roughly the size of a large coffee table or a very assertive flat-screen TV. For commercial setups, you're usually looking at panels closer to 78 inches long.

What are the dimensions of a 96-cell solar panel?

96-cell solar panel size. The dimensions of 96-cell solar panels are 41.5 inches long and 63 inches wide. That's a 41.5x63 solar panel.
