

**NKOSITHANDILEB SOLAR**

# **North American Energy Storage Project Development Company**

## Overview

---

How many energy storage projects does Engie have in North America?

Today, ENGIE has 3 grid-scale energy storage projects in North America with the capacity to deliver 520 MW of power to the grid and another 2 GW under construction. These projects support the growing demand for renewable energy and enable greater reliability and resilience on power grids, while enabling the net zero energy transition.

Are investors looking to acquire energy storage projects?

Investors are looking to acquire energy storage projects using robust energy storage technologies. Don't let a lack of support, experience, and transparency lead to a failure to execute. Momentum Energy Storage Partners has over a gigawatt of battery storage projects in development across the US.

Who is momentum energy storage partners?

Momentum Energy Storage Partners has over a gigawatt of battery storage projects in development across the US. Our expertise in energy storage differentiates us from other developers. We are your partner throughout the entire process from development to commissioning. We continue to support our investors through the entire process.

What is Engie energy storage?

ENGIE designs, deploys, operates and aggregates grid scale and onsite energy storage systems, which can dispatch electricity when needed, even during peak hours, with 24/7 reliability. Grid-scale storage offers reliability and ancillary services to meet the growing demand for electricity needs.
