# Notice on promoting new energy storage and dispatching applications

## Overview

---

What is the NEA 'promotion of new energy storage integration & dispatch utilization'?

The NEA issued a notice in April titled "Promotion of New Energy Storage Integration and Dispatch Utilization", aimed at standardizing the integration of new energy storage into the grid and promoting efficient dispatch utilization of new energy storage.

How is the government advancing energy storage technologies?

The government has been continuously advancing energy storage technologies, with several compressed air energy storage, flow battery storage, and sodium-ion battery storage projects put into operation across the nation, Bian Guangqi, an NEA official, said at the conference.

What is new energy storage?

New energy storage, or energy storage using new technologies such as lithium-ion batteries, liquid flow batteries, compressed air and mechanical energy, is an important foundation for building the country's new power system, which enjoys advantages such as quick response, flexible configuration and short construction timelines.

Where are new energy storage facilities being built?

According to the administration, the northern and northwestern parts of the country have seen the fastest development of new-type energy storage facilities, accounting for over 50 percent of the newly operational energy storage installations nationwide.

The government has been continuously advancing energy storage technologies, with several compressed air energy storage, flow battery storage, and sodium-ion battery storage projects put into operation across the nation, Bian Guangqi, an NEA official, said at the conference.

New energy storage, or energy storage using new technologies such as lithium-ion batteries, liquid flow batteries, compressed air and mechanical energy, is an important foundation for building the country's new power system, which enjoys advantages such as quick response, flexible configuration and short construction timelines.

According to the administration, the northern and northwestern parts of the country have seen the fastest development of new-type energy storage facilities, accounting for over 50 percent of the newly operational energy storage installations nationwide.

In combination with new energy storage multi-scenario and market-oriented operation needs, actively carry out research and development work on new energy storage ...

The General Department of the National Energy Administration issued a notice to publicly solicit opinions on the Notice on Promoting the Grid-connected and Dispatching ...

The National Energy Administration issued the "Notice on Promoting the Grid Connection and Dispatching Application of New Energy Storage" On April 12, the National ...

On June 7, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued the Notice on Promoting the Participation of New ...

The NEA issued a notice in April titled "Promotion of New Energy Storage Integration and Dispatch Utilization", aimed at standardizing the integration of new energy ...

On November 20, the General Affairs Department of the National Energy Administration issued a public notice soliciting opinions on the "Notice on Promoting New Energy Storage Grid ...

Energy Storage China Network learned that on April, the National Energy Administration issued a notice on promoting the grid connection and scheduling of new energy storage. The ...

In April of this year, the National Energy Administration issued the "Notice on Promoting the Grid Connection and Dispatch Utilization of New Energy Storage" (National ...

April 12, the National Energy Board issued "on the promotion of new energy storage grid and scheduling the use of notice", the document requires an accurate grasp of the new energy ...

Energy storage plays a crucial role in facilitating the wide application of renewables as part of the world's energy transition effort. In China, supportive policies are of ...
