# **Oslo companies that make energy storage lithium batteries**

## Overview

---

Elinor Batteries has signed an MoU with SINTEF Research Group to open a sustainable, giga-scale factory in mid-Norway, and HREINN will manufacture 2.5 to 5 million GWh batteries annually using lithium iron phosphate (LiFeP04) technology. Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. “There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It’s the key to turning intermittent wind and solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

Why is Norway a leader in battery manufacturing?

As a pioneer in the clean energy sector, Norway has also shown strength in battery manufacturing. As the global demand for sustainable energy solutions grows, Norwegian battery manufacturers are at the forefront of this change.

Who are the top 10 battery manufacturers in Norway?

This article will introduce the top 10 battery manufacturers in Norway, such as Morrow, FREYR Battery, and TECO 2030. These companies have made significant achievements in technological innovation, sustainable production, and international cooperation, contributing not only to the Norwegian economy, but also to the global green transition.

What is battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU’s battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

## Oslo companies that make energy storage lithium batteries

---

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

As a pioneer in the clean energy sector, Norway has also shown strength in battery manufacturing. As the global demand for sustainable energy solutions grows, Norwegian battery manufacturers are at the forefront of this change.

This article will introduce the top 10 battery manufacturers in Norway , such as Morrow, FREYR Battery, and TECO 2030. These companies have made significant achievements in technological innovation, sustainable production, and international cooperation, contributing not only to the Norwegian economy, but also to the global green transition.

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU's battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

As a pioneer in the clean energy sector, Norway has also shown strength in battery manufacturing. As the global demand for sustainable energy solutions grows, Norwegian ...

A giga-scale factory for battery cell production located in Mid-Norway. Utilizing renewable energy, we are spearheading the development of a ...

Why Oslo's Battery Storage Boom Matters Right Now Norway's renewable energy sector

is kind of at a crossroads. With hydropower supplying 90% of electricity and wind farms expanding ...

EVE Energy and Vimab BESS AB Sign Memorandum of Understanding to Advance Europe's Energy Transition To be the most creative lithium ...

Oslo's Emerging Battery Powerhouses While Oslo itself doesn't host large-scale battery production facilities, Norway's capital serves as the strategic hub for several innovative energy ...

The Storage Gap in Nordic Energy Markets Last winter's energy crunch saw Norway importing coal power for the first time since 2015. This isn't just about keeping lights on--it's about ...

Imagine a world where cities store renewable energy as efficiently as Vikings stored dried fish for winter. That's exactly what Oslo battery energy storage principle is ...

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong ...

Headquartered in Oslo, Norway, ECO STOR, a portfolio company of Norwegian utility company Agder Energi, is a leading second-life energy storage development business focused on ...

Oslo's winter nights are long, cold, and dark--perfect conditions for testing the mettle of energy storage systems. As Norway pushes toward its 2030 renewable energy ...

Let's face it - when you think of Oslo, fjords and Nordic winters probably come to mind before lithium batteries. But here's the kicker: Norway's capital is quietly becoming a ...

Simultaneously, the Energy Storage System market has witnessed exponential growth as lithium-ion Battery Packs offer scalable and ...

Detailed info and reviews on 7 top Energy Storage companies and startups in Norway in 2025. Get the latest updates on their products, jobs, funding, investors, founders ...

Detailed info and reviews on 7 top Energy Storage companies and startups in Norway in 2025. Get the latest updates on their products, jobs, funding, investors, founders ...

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was ...

Corvus Energy specializes in energy storage solutions, notably providing advanced maritime batteries that enhance capacity, safety, and cost-effectiveness. Their commitment to zero ...

Nordic Batteries designs and manufactures high-power and high-energy battery modules, BMS and BESS products. The company ...

Why Your Business Can't Afford to Wait With Norway's carbon tax hitting EUR200/ton in 2025, companies using Oslo-based energy storage systems are basically printing money. Take the ...

EVE Energy and Vimab BESS AB Sign Memorandum of Understanding to Advance Europe's Energy Transition To be the most creative lithium battery leading company and continuously ...

Built with cutting-edge lithium-ion technology, this battery ensures efficient energy storage, long lifespan, and seamless integration with renewable energy systems.

Despite only launching its energy storage arm in 2015, as of 2023 the company had an output of 14.7GWh in battery energy storage ...

Simultaneously, the Energy Storage System market has witnessed exponential growth as lithium-ion Battery Packs offer scalable and modular solutions for grid stabilization, peak load ...
