Ottawa Rainproof Power Station Generator BESS

Overview

Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

What changes will be made to Bess in Ottawa?

The amendments approved on Jan. 23 will set policy direction for BESS, in both rural and urban areas. Additionally, the city will be required to demonstrate that Ottawa Fire Services' are satisfied with the design of each BESS facility, meeting effective fire and safety risk management.

What is the Ottawa Bess 2 project?

The Ottawa BESS 2 Project will consist of lithium-ion battery cells connected in stacks and installed inside an enclosed area, like a shipping container or a small enclosure. The enclosed area will also house the balance-of-plant equipment such as an inverter, a battery management system and a dedicated HVAC unit for proper ventilation.

What are Ottawa fire services' requirements for a Bess facility?

Additionally, the city will be required to demonstrate that Ottawa Fire Services' are satisfied with the design of each BESS facility, meeting effective fire and safety risk management. It will also be required to install fire prevention and suppression systems, as well as provide site-specific training for firefighters.
