Overview

What is an outdoor access point (AP)?

Whether you're setting up a network in a rugged environment, open field, or a sheltered outdoor area, outdoor access points (APs) provide the durability and range needed to deliver reliable WiFi beyond indoor spaces.

What is the best outdoor access point?

Our statistics say that it is the most favorite Outdoor Access Point from the list above. If you're still undecided, I would recommend that you go with the masses and choose the top selling outdoor access point: The TP-Link Omada Long Range Point is the hottest bestseller in this category right now.

Which Ubiquiti access point is best for outdoor use?

The Unifi Mesh access point is at the moment the most popular access point from Ubiquiti to use outdoors. It comes with two adjustable Omni antennas that can be angled 45 degrees to cover the area beneath the access point better. The antennas are removable, allowing you to replace them with spot-beam antennae for example.

What is the difference between indoor and outdoor access points?

Outdoor access points are built to withstand harsh weather conditions and have higher IP ratings for water and dust resistance, whereas indoor access points are not designed for such conditions. Do I need an outdoor access point if I only want coverage for a backyard?
