

NKOSITHANDILEB SOLAR

Outdoor power boost charging

GRADE A BATTERY

LiFepo4 battery will not burn when overcharged over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

Is solar boost a good charger for outdoor activities?

As outdoor activities gain popularity, the need for reliable and power-efficient charging solutions has never been more critical. Solar Boost, a high-capacity, solar-powered charger, stands out as a game-changer for hikers, campers, and adventurers alike.

Can solar boost charge any USB-compatible device?

Yes, Solar Boost can charge any USB-compatible device, including tablets, GPS units, cameras, and portable speakers. As long as the device uses a USB connection, it can be powered by Solar Boost. Solar Boost stands out as an innovative and power-efficient solution for outdoor charging.

How do I charge the mophie power boost XXL?

To charge the mophie power boost XXL, connect the included micro-USB cable and plug it into an optional USB charger or available USB port on a desktop or laptop computer. Charging the power boost enables the built-in high-density batteries to hold their charge for an extended period, ensuring they have as much power as possible when you're ready to use it.

What is a boost charge wireless charging pad?

The Boost Charge Wireless Charging Pad 10W has been engineered to charge Apple and Samsung smartphones at the fastest possible wireless charging speed while delivering 5-watts to all other Qi-enabled devices. Charge without removing your case. Our Boost Charge Wireless Charging Pads are engineered to work with lightweight plastic cases up to 3mm.
