

Outdoor power rating

Overview

What IP rating do I need for outdoor applications?

For outdoor applications, we generally recommend products with a minimum rating of IP44, but many situations require higher protection. Based on our decade of online experience and countless customer consultations, we've compiled the most commonly needed IP ratings for specific outdoor scenarios: IP44 - Suitable for: IP65 - Suitable for:.

Are outdoor electrical products safe?

When you're working on outdoor electrical projects, choosing the wrong products can lead to dangerous failures, costly replacements, and unnecessary headaches. At Power Discount, we've seen countless customers confused about which electrical products are genuinely safe for outdoor use.

Which outdoor power equipment should you buy?

You'll typically find him in his old fixer-upper, engrossed in a DIY project or trying out a new recipe. The best outdoor power equipment you can buy right now, from Consumer Reports tests of snow blowers, lawn mowers, string trimmers, and more.

How does Consumer Reports test outdoor power equipment?

Consumer Reports' process goes something like this: Every year, our market analysts identify hundreds of new pieces of outdoor power equipment. We deploy a team of secret shoppers to buy each model we test to ensure that we're getting the same products you'd find at retail. Even after we test the tools, we're still not done.
