Outdoor wireless base station issues

Overview

How do I know if my base station is working?

Check that your Base Station is set up and connected. The Base Station should be listed in your Wyze app, and the status light should be solid blue. Check if your Base Station has reached the 4-camera limit. If you have multiple Wyze Cam Outdoor v1/v2 cameras, you need a new Base Station for every 4 outdoor cameras you own.

Why should you choose TP-Link outdoor wireless base station?

With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage. The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users.

How do I update my Wyze base station firmware?

Check your Base Station for firmware upgrades. In the Wyze app, go to Account > Firmware Upgrade > Update next to Wyze Base Station. Outdated firmware can cause the setup process to fail. Have more questions?

Submit a request.

Why is my Wyze Cam Outdoor v1 v2 status light not working?

Verify the status light color. If it's not flashing blue and yellow, it is not in pairing mode and you won't be able to set it up. If your Wyze Cam Outdoor v1/v2's status light isn't on at all, make sure the power switch is in the on position. Make sure Wyze Cam Outdoor v1/v2 has a strong signal for setup.
