# Pack built-in battery

**LPW48V100H  
48.0V or 51.2V**

## Overview

---

Does a backpack have a built-in battery?

Instead of including a built-in battery, the backpack uses a clever cable pass-through system. This allows you to route cables from an internal power bank compartment to an external pocket, making it easy to charge devices like phones, laptops, and tablets while on the go.

Do backpacks have a built-in Charger?

**Backpack with Built-in Charger:** Backpacks with built-in chargers take convenience to the next level. They come equipped with a built-in power bank, eliminating the need for external devices. Simply plug your devices into the designated charging ports within the backpack, and you're ready to charge.

What is the battery capacity of a backpack?

The battery capacity of power banks commonly used in these backpacks typically ranges between 10,000mAh and 20,000mAh. When selecting a charging backpack, prioritize a model with ample battery capacity and an easily accessible USB port. If you rely on modern devices, look for backpacks with USB-C ports, though these are less common.

What is a power bank backpack?

1. **Integrated Power Bank Backpack:** These backpacks come with a built-in power bank, which has USB ports to charge your devices. They are convenient for charging smartphones, tablets, and other gadgets directly from the backpack.
