# Paris department store uses 120-foot folding shipping container

## Overview

---

What are shipping container and steel frame modular retail units?

Our shipping container and steel frame modular retail units provide a cost-effective, innovative solution for developers, start-ups, and established brands alike. Whether you need mobile, semi-permanent, or permanent retail spaces, we offer flexible options tailored to fit your vision.

How to use shipping containers in retail store design?

Innovative ways to use shipping containers in retail store design include stacking multiple containers to create multi-level spaces, incorporating green roofs, and utilizing outdoor areas for pop-up shops. These modifications maximize space and enhance the shopping experience.

Can shipping containers be modified for a retail store?

Using shipping containers for a retail store provides a cost-effective solution that can be modified to fit various design needs. Their durability allows them to withstand harsh weather conditions, making them suitable for both interior and exterior use. How can modification enhance the functionality of a retail store made from shipping containers?

How can a shipping container retail store meet local building codes?

Businesses can ensure their shipping container retail store meets local building codes and regulations by consulting with architects or contractors experienced in container modifications. They should also research zoning laws and obtain necessary permits before construction begins.
