Portable power source factory in Finland

Overview

Is Finland a possible location for a battery cell factory?

SVOLT states in its press release that Finland is one possible location of the future factory. The EIA procedure for the planned battery cell factory in Kotka examines a maximum annual production capacity of 50 gigawatt hours. Roughly estimated, a capacity of 10 gigawatt hours means an investment of around one billion euros.

Is Finland positioning itself in terms of industrial investments?

Now it is a real place for the Government Council, which is only a few months old, to show where Finland is positioning itself in terms of industrial investments coming our way”, says Esa Sirviö, Mayor of the City of Kotka.

Is a battery cluster emerging in the Kotkan-Hamina region?

With the realization of all ongoing projects in the battery industry, a significant battery cluster is emerging in the Kotkan-Hamina region, even on a European scale.
