Portable rainproof power bank

Overview

What is the best waterproof power bank?

As you can see from the chart below, an IP68 would be the highest possible rating. However, most of the best waterproof power banks are rated to IP67, which is more than enough protection for rugged outdoor use.

How much Mah is a waterproof power bank?

The massive 30,000 mAh is enough for up to 13 full charges of most smartphones and is so powerful that it can be used with laptops and portable gaming devices. If you need a waterproof power bank to use outdoors and last for multiple days at a time while still charging all your gadgets, this is 100% the one to get.

Are Anker power banks waterproof?

Anker power banks are not waterproof and nor do they claim to be. The casing is made from waterproof materials but does not have a waterproof construction. Water can get in through the joints and the charger input, so it won't fare well if submerged. If you spill water on it or it gets a little bit wet in the rain though, you should be ok.

Are portable power banks good for camping?

Durable outer casings made from reinforced plastics or rubberized materials absorb shock better than standard consumer models. These features guarantee consistent performance throughout your camping adventures. I've outlined eight top-performing portable power banks that deliver reliable energy storage for your camping needs.
